

## **ADR Data Recovery Becomes a Partner**

### **Gabriel Phoenix Communications to use ADR Data Recovery Exclusively for Data Recovery Services**

**Kaneohe, HI, October 3, 2006** - ADR Data Recovery, which provides data recovery and computer forensics -- for small & medium businesses, large enterprise companies, government agencies, educational institutions, and the health care industry -- today announced a new referral partnership agreement with Gabriel Phoenix Communications. The agreement makes possible for Gabriel Phoenix Communications to utilize ADR Data Recovery services as a partner and provide data recovery services to their customers.

The agreement, which was finalized on October 1, 2006, partners one of the nation's largest data recovery companies, which has 12 regional labs and 19 service centers, with Gabriel Phoenix Communications which services customers in the Hawaiian region.

The partnership provides Gabriel Phoenix Communications with a major new data recovery service which they offer to their customers, taking advantage of ADR Data Recovery's 10 years of experience recovering data from a variety of media sources and conditions. By implementing this referral program, Gabriel Phoenix Communications will be able to provide added value for their customers.

"We are excited to be joining the ADR Referral Program", said Derek Gabriel. "We believe this will offer us expansion opportunities in the markets we currently service for ourselves, as well as create a partnership for growth in new markets."

As a result of the new agreement, Gabriel Phoenix Communications will be able to provide additional computer services support to our customers by utilizing ADR Data Recovery's experience. Further, the partnership will afford Gabriel Phoenix Communications' existing customers, and all future customers in the Hawaiian region, the opportunity to participate in, and take advantage of, the data recovery specialists at ADR Data Recovery.

"We are very excited to be partnering with Gabriel Phoenix Communications, providing the services and solutions key to advancing and enhancing their computer services," said Kevin Jackson, President and CEO of ADR Data Recovery. "Our goal is to provide data recovery and computer forensic services to businesses across the nation. Our partnership with Gabriel Phoenix Communications is an important step forward in achieving that goal."
